COTTON

Harvest is moving quickly and to this point yields are about what was expected or in many places even worse. Unfortunately, harvest will go quickly this year but hopefully we will be able to put this year behind us and look forward to next year.

I put out a harvest aid trial at Allen Jansa's on Hwy 137 a little over a week ago. Differences in treatments are now showing up and you are welcome to stop by and look. We would have had better results with several products but when we got started, we realized that we didn't have any NIS so we used a COC in all treatments which effected the performance of several products.

WHEAT

Continue to keep an eye out for armyworms in wheat at this time, especially in fields near haygrazer or abandoned sorghum. They are still sporadic, but where they can be found they are building .

2020 Harvest Aid Evaluation - Allen Jansa

Glasscock Co - Irrigated

| Treatment | Rate | Rate | 10/7/2020 | | | | | | | |
